INTRODUCTION

Platform Overview

Everything you need to manage professional town planning licenses in Nigeria — in one unified platform.

The **TOPREC Admin Portal** is a purpose-built web application designed for the **Town Planners Registration Council of Nigeria**. It provides registered town planners, consulting firms, and practice firms with a secure, modern interface to manage their professional licenses, process payments, maintain profiles, and stay compliant with regulatory requirements.

Administrators and super-administrators gain access to a comprehensive member directory, payment configuration tools, and real-time oversight of the entire membership base. The platform replaces manual, paper-based workflows with a streamlined digital experience — from initial registration through annual license renewal.

MODULE 01

Authentication & Security

Enterprise-grade authentication with JWT tokens, OTP verification, and automatic session management to protect every account.

Secure Login

Authenticate using your TOPREC registration number (e.g., RTP/1*** or PFN/5**) and password. Features include:

- Password visibility toggle
- Real-time field validation
- Loading state with animated spinner
- Auto-redirect to dashboard on success
- Existing-user profile update modal

Member Registration

Full sign-up flow with role selection and comprehensive form collection:

- Role: Member, Consulting Firm, or Practice Firm
- Personal Info: name, email, phone, address, gender
- Professional: registration number, state, date
- Security: password with strength requirements
- Conditional fields based on selected role

Password Recovery

Multi-step password recovery with OTP verification for identity assurance:

- Enter email or registration number
- Receive 6-digit OTP via email
- Verify OTP with cooldown-based resend
- Set new password (min. 6 characters)
- Auto-redirect to login on success

Session Management

Robust token-based session handling to ensure secure, uninterrupted usage:

- JWT access & refresh token architecture
- Automatic token refresh 5 min before expiry
- Persistent login via localStorage
- Route guards: AuthGuard & NoAuthGuard
- Global error interceptor for 401/403

Password Recovery Flow

The OTP-verified process ensures that only the account owner can reset their credentials, adding an essential layer of identity protection.

1

Enter ID

Email or Reg. No.

2

Receive OTP

6-digit code via email

3

Verify OTP

Enter & validate code

4

New Password

Set & confirm

5

Login

Auto-redirect

MODULE 02

Dashboard Home

A personalised command centre providing real-time visibility into license status, financial standing, and profile health at a glance.

Key Metrics Dashboard

STATISTICS CARDS

- **License Status** — Active, Expired, or Blocked badge with days-remaining countdown
- **Levy Balance** — Outstanding balance in Nigerian Naira (₦) with Clear/Outstanding indicator
- **Profile Completion** — Percentage progress bar showing X/Y fields completed, clickable to navigate to profile
- **Member Since** — Registration date with role display

QUICK ACTIONS

- **Update Profile** — One-click navigation to edit personal information
- **Make Payment** — Direct access to license renewal payment processing
- **View License** — Instant access to view and download your practice license

Smart Alerts & Banners

Context-aware notification banners that appear automatically based on your account status:

- **License Renewal Reminder** — Appears when license expires within 60 days, with gradient green banner and "Renew Now" call-to-action
- **Outstanding Levy Warning** — Red gradient alert when financial obligations are pending, with "Pay Now" button

License Validity Tracker

Visual representation of your annual license period with real-time progress tracking:

- Horizontal progress bar showing elapsed days in the calendar year
- Issued date to expiry date range display (Jan 1 – Dec 31)
- Colour-coded status: green (safe), orange (expiring soon), red (expired)
- Personal information summary (membership number, role, email)

Personalised Welcome Experience

The dashboard greets each user by their first name alongside the current date. The license status badge is prominently displayed in the header — providing instant clarity on whether the user's license is Active, Expired, or Blocked, ensuring compliance awareness from the moment they log in.

MODULE 03

Profile Management

Complete professional profile with photo management, editable fields, and read-only regulatory data — ensuring accuracy while giving users control over their contact details.

Profile Card & Photo Management

PROFILE HEADER

- Professional gradient header with avatar display
- Profile photo upload (JPEG, PNG, WebP — max 5 MB)
- Initials fallback when no photo is uploaded
- Camera icon overlay for quick photo change
- Upload & remove photo actions with loading states
- Membership ID and “Active Member” badges

EDIT & VIEW MODES

- Toggle between view and edit modes
- Visual distinction: disabled fields shown in grey
- Cancel reverts all changes to original values
- Save button disabled until form is valid
- Success/error alerts with auto-dismiss (3 seconds)
- Loading spinner during data fetch

Personal Information

Core personal details with appropriate edit permissions:

- **Full Name** — Read-only; requires contacting TOPREC support to change
- **Email Address** — Editable with email format validation
- **Phone Number** — Editable with +234 Nigerian format
- **Address** — Editable, minimum 5 characters
- **Gender** — Editable dropdown (Members only): Male, Female, Other, Prefer not to say

Professional Information

Regulatory data managed by the council:

- **Membership Number** — Read-only; issued by TOPREC
- **State of Practice** — Editable dropdown populated from API with all Nigerian states
- **Date of Registration** — Read-only; set at account creation
- Tooltips on read-only fields explain why they cannot be changed
- Red asterisks mark all required fields

Data Integrity Safeguards

Critical regulatory fields — Full Name, Membership Number, and Registration Date — are locked to prevent unauthorised modifications. Users wishing to correct these fields are guided to contact TOPREC help and support via informational tooltips, maintaining the integrity of the professional registry.

MODULE 04

License & Certificate

Digital license certificates with QR code verification, PDF download, and real-time expiry tracking — bringing paperless efficiency to professional licensing.

Digital Certificate

A professionally designed, printable license certificate rendered directly in the browser:

- Official TOPREC crest, council name, and establishment decree
- Role-specific authorization text referencing the relevant Town Planners Act provisions
- User's full legal name in decorative typography
- Validity period (annual: Jan 1 – Dec 31)
- Registrar's signature block
- Green decorative border with concentric circle pattern

Verification & Sharing

Built-in verification ensures every certificate's authenticity:

- **QR Code** — Embedded on each certificate, linking to a unique verification URL
- **Download as PDF** — Print-optimised rendering via the browser print dialogue
- **Print** — Direct printing from the application
- Certified Seal displayed for Consulting and Practice Firms
- Certificate elements hidden on-screen are visible in print layout

TOWN PLANNERS REGISTRATION COUNCIL OF NIGERIA

Certificate of License to Practice

This certificate authenticates that

John Adeyemi Okonkwo

Having complied with the provisions of Section (5)(1) Town Planners (Registration, etc.) Act, CAP T7 LFN 2004, is hereby authorized to practice as a **Registered Town Planner** within the Federal Republic of Nigeria.

Valid Till
Dec 31, 2026

QR

Tpl. Uhiere Samuel

Expiry Tracking

- Status badges: **Active** (green), **Expired** (red), **Pending** (yellow), **Suspended** (grey)
- Days-remaining countdown displayed prominently
- Renewal reminder banner at ≤ 60 days until expiry with direct "Renew License Now" action

Financial Compliance Gate

- Outstanding levy balances block access to the license page entirely
- Clear messaging explains why access is restricted
- Direct "Settle License Fees" button routes to the Payments module
- License automatically becomes viewable once balance is cleared

MODULE 05

Payments & Renewals

End-to-end payment processing powered by Remita — Nigeria's leading payment gateway — with automatic tax calculation, receipt generation, and comprehensive payment history.

License Renewal Payment

PAYMENT CONFIGURATION

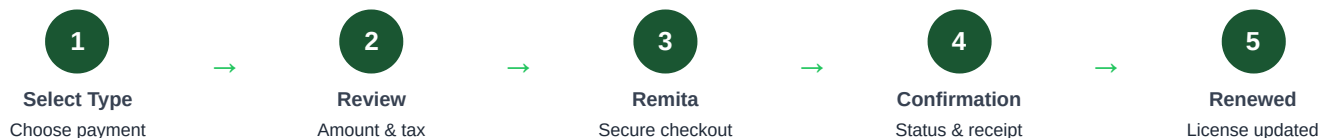

- Dynamic payment type selection from admin-configured options
- Automatic subtotal, tax rate, and total calculation
- Tax amount computed as a percentage of the base amount
- Currency displayed in Nigerian Naira (₦)
- Phone number pre-filled from user profile
- Outstanding balance detection with combined payment flow

REMITA INTEGRATION

- Secure inline checkout via Remita SDK
- Dynamic script loading with CDN fallback URLs
- Unique reference generation (TOPREC-timestamp-random)
- Remita Retrieval Reference (RRR) tracking
- Real-time payment status callbacks
- Automatic license renewal on successful payment

Payment Processing Flow

From type selection through Remita checkout to license renewal — the entire process is handled seamlessly within the application.

Payment History & Records

HISTORY TABLE

- Chronological list of all past transactions
- Columns: Date, Description, Reference, RRR, Amount (₦), Status, Method
- Colour-coded status: Successful (green), Pending (orange), Failed (red)
- Pagination with configurable items per page
- Payment count badge on the History tab

ACTIONS & FILTERS

- Filter by status: All, Successful, Pending, Failed
- Refresh individual payment status in real time
- Download payment receipt / confirmation
- Planned export options: CSV, Excel, and PDF
- Tab state persisted in localStorage across sessions

MODULE 06

Members Directory

A centralised administration hub exclusively for super-administrators — providing full visibility and management control over the entire TOPREC membership base.

Three-Tab Directory View

The directory is organized into three distinct categories, each with dedicated count badges, search, and filtering capabilities:

DIRECTORY CATEGORIES

- **Members** — Individual registered town planners with personal details, registration numbers, and practice status
- **Consulting Firms** — Registered consulting organisations authorised for large-scale planning projects (master plans, EIS, campus plans, subdivisions > 10 hectares)
- **Practice Firms** — Registered firms authorised for site analysis, smaller layouts (< 10 hectares), development permits, and advisory services

MANAGEMENT FEATURES

- Quick stats dashboard showing total and active member counts
- Unified search across name, email, and registration number
- Status filter dropdown (Active, Inactive, Pending, etc.)
- Category-specific count badges on each tab
- Tabular view with full contact information
- View, edit, and manage individual member records

Search & Filter

Powerful tools to quickly locate specific members in large directories:

- Full-text search across all member fields
- Status-based filtering (Active, Inactive, Suspended, Pending)
- Category-based filtering by role type
- Real-time result updates as filters are applied

Statistics Dashboard

At-a-glance metrics for workforce oversight:

- **Total Members** — Blue badge showing aggregate count across all roles
- **Active Members** — Green badge showing currently active registrations
- Per-tab count badges for Members, Consulting Firms, and Practice Firms
- Real-time data refresh from the member API

Superadmin Exclusive

The Members Directory is restricted to users with the Superadmin role. The sidebar navigation item is dynamically hidden for all other roles through role-based menu filtering, and route guards enforce access control at the application level.

MODULE 07

Settings & Preferences

Security credentials, notification channels, and payment settings with role-based tab visibility.

Security Settings

OTP-verified password change ensures only the account holder can modify credentials, via three secure steps:

01

Request OTP

System sends a one-time passcode to the registered email address for identity verification.

02

Verify OTP

Enter the 6-digit code received. Includes cooldown-based resend functionality if the code expires.

03

Set New Password

Enter and confirm a new password (min. 8 characters) with strength requirements enforced.

- Security tip cards with best practice guidance
- Password strength: uppercase, lowercase, numbers, special characters
- Modal-based step flow with progress indicators
- Available to all authenticated users regardless of role

Notification Preferences

Six notification channels with toggle switches and quick "Enable All" / "Disable All" controls:

- **Email Notifications** — Important updates and announcements via email
Sent to registered email address **Default: On**
- **SMS Notifications** — Instant text message alerts for urgent matters
Standard messaging rates may apply **Default: Off**
- **Payment Reminders** — Deadline and due date notifications
Sent 7 days before due date **Default: On**
- **License Renewal Reminders** — Never miss your renewal deadline
Sent 30 days before expiry **Default: On**
- **TOPREC Newsletter** — Monthly industry updates and news
Sent monthly on the 1st **Default: Off**
- **System Alerts** — Critical system and security notifications
Important security updates **Default: On**

Payment Settings (Superadmin Only)

Super-administrators have access to a dedicated Payment Settings tab for configuring payment types, base amounts, tax rates, and Remita gateway parameters. This tab is completely hidden from all other user roles.

TECHNICAL FOUNDATION

Architecture & Tech Stack

Built on modern, enterprise-grade technologies — ensuring performance, security, and maintainability.

Angular

v17.3 • Standalone APIs

Modern component architecture with lazy-loaded feature modules and reactive forms.

TypeScript

v5.4 • Strict Mode

Full type safety with strict compilation, interfaces, and generics for API contracts.

Tailwind CSS

v3.4 • Utility-First

Responsive, mobile-first styling with SCSS integration and custom configuration.

RxJS

v7.8 • Reactive Streams

BehaviorSubjects for state management, observable-based HTTP, and event handling.

JWT Auth

Access & Refresh Tokens

Dual-token security with automatic refresh, guards, and HTTP interceptors.

Remita SDK

Inline Checkout

Dynamically loaded payment gateway with CDN fallbacks and RRR tracking.

Navigation & User Experience

SIDEBAR NAVIGATION

- Fixed sidebar on desktop, collapsible on mobile
- Dark green gradient with TOPREC branding
- Active route indicator with white highlight
- Role-based menu item filtering
- User profile section with avatar, name, and role
- Logout button with session cleanup

APPLICATION-WIDE FEATURES

- Toast notifications (success, error, warning, info) with auto-dismiss
- Loading states with spinners on all async operations
- Responsive design for desktop, tablet, and mobile
- Form validations with inline error messages
- Lazy-loaded modules for optimised performance
- XSRF protection on all HTTP requests

Security Architecture

AUTHENTICATION LAYER

- **AuthGuard** — Protects all dashboard routes; redirects unauthenticated users to login
- **NoAuthGuard** — Prevents authenticated users from accessing login/signup pages
- **Auth Interceptor** — Injects Bearer token into every outbound HTTP request

ERROR HANDLING

- **Error Interceptor** — Catches all HTTP errors globally (401, 403, 500, etc.)
- Automatic session invalidation on authentication failures
- User-friendly error messages via the notification service

Ready to Get Started?

The TOPREC Admin Portal brings professional licensing into the digital age. Secure, efficient, and built for the future of town planning regulation in Nigeria.
